Here is how your foursome helps...

The Carroll Technology Council is the best kept secret in the county. Did you know that almost every penny spent on the Tech Council benefits our community! That's right, the Tech Council is a 501(c)(3) organization with a mission: to serve it's members, the business community, local government and the community at large. Our mission is to provide leadership, information, and resources to educate, attract, and influence technology in Carroll County.

“*Carroll County Economic Development is committed to promoting and supporting technology development in Carroll County. One way we accomplish this is through support of the Carroll Technology Council. I encourage everyone to take advantage of this valuable and dynamic organization.*”

Lawrence F. Twele, Director
Carroll County Department of
Economic Development

So, by playing a round of GOLF with us, your support allows us to continue the programs that help students receive their first computer, or bring local non-profits and business owners up to speed with the ever changing software market, or teach folks in the community to better utilize their own computers to communicate with loved ones accross the county.

CompuKids

Today the computer is an essential educational tool both in and outside the classroom. The child without access to a computer at home has a great disadvantage when completing homework assignments, conducting research and writing papers for classes. The focus of the CompuKids program is to provide computers to county children who would not otherwise have access to them outside the classroom.

Speaker Series

Carroll Technology Council Speaker Series informs and encourages discussion about topics that affect members, local businesses and government. Technology experts and advocates share knowledge and resources to promote the adoption of new technologies for home and business use.

The List of Carroll Area Technical Expertise (LOCATE)

It's an online database of technology resources in the county, is available on our website for member and community access. Listings include member and non member companies. Member companies feature special announcements and promotions for the general public.

Education

The Tech Council believes that education and training is essential for the continued professional growth of our members and member companies and is central to our mission. The Education Committee plans, promotes and implements educational programs that contribute to the continuing technology education of members. It also facilitates the distribution of education and training information and provides scholarship opportunities for students pursuing a technology career.

**Being the techies that we are...
of course you can donate online!**
